M86 Internet Filter Override Account Request

I am requesting that I be issued a M86 educator override account. I am requesting this action to permit me to access educationally valuable information that is beneficial to student learning and that is currently blocked by the M86 filter. I understand that when the M86 filter is overridden, numerous inappropriate Internet sites are available and that I am solely responsible that these sites are not accessible by district students. Additionally, I have already submitted a "request review" to M86 and that request has been declined.

*** All M86 educator override account use is monitored and recorded.**
